

THE CORRIGO LIBERO

BENEFITS DIAGRAM

LIBERO BENEFITS

LIBERATING THE SPINE WITH BESPOKE SUPPORT

Adjusts around your own back shape.

A lumbar and sacrum support adjusts in both depth and height for a perfect fit

Supports your own perfect working posture.

The backrest has an independently adjustable angle feature allowing you to fine tune the sitting angle at which the backrest supports you – from an upright to a more relaxed posture.

Relieves the neck and shoulders of tension and pain, as well as preventing RSI.

The armrests are uniquely placed to support your arms in the optimum position. They adjust in height, width, depth and angle to ensure a true fit with your body, available in 3 sizes to further ensure a perfect fit.

Providing support for your legs and the height and length that is right for you.

The seat adjusts in height and depth, allowing you to set it at your own sitting height and thigh length, relieving pressure under the knees.

A Backrest that ‘hugs’ your spine and allows freedom of movement.

The unique design cradles your spine all the way from the base to the tip. The slim shape not only supports between your shoulder blades (promoting an upright, open chested posture), it also allows you to reach around you with ease

Relieves your back from tension and pain.

The contoured backrest adjusts in height and includes an inflatable lumbar support. This allows you to adjust the backrest to support your upper and lower back in exactly the right places, keeping it in a healthy S shape posture.

Mobilises your hips and activates your core.

The DSM (Dynamic Support Mechanism), which allows both fixed OR dynamic sitting, mobilizing the hips and activating the core. This adjusts to provide a movement that is in tune with your own body. The seat can be set at either a downward tilt or horizontal position whilst the backrest moves.

Long term comfort:

The unique horseshoe shaped seat provides a generous level of cushioned support whilst allowing ventilation – ensuring comfort for those long working hours.
